Ingestion: Swallowing this material may be harmful or fatal. Symptoms may include severe stomach and intestinal irritation (nausea, vomiting, diarrhea), abdominal pain, and vomiting of blood. Swallowing this material may cause burns and destroy tissue in the mouth, throat, and digestive tract. Low blood pressure and shock may occur as a result of severe tissue injury.

Inhalation: Breathing of vapor or mist is possible. Breathing this material may be harmful. Symptoms usually occur at air concentrations higher than the recommended exposure limits (see section 2). Signs and symptoms of exposure to this material may include irritation (nose, throat, airways), cough, shortness of breath, difficult breathing, lung edema (fluid buildup in the lung tissue).

SECTION 4 : FIRST AID MEASURES

Eye Contact: Flush with large amounts of water for at least 15 minutes. Seek medical aid.

Skin Contact: Immediately flush with large quantities of water while removing contaminated clothing.

Inhalation: Remove from exposure. If breathing has stopped or is difficult, administer artificial respiration or oxygen as needed. Seek medical aid.

Ingestion: DO NOT INDUCE VOMITING! Rinse mouth with water and give plenty of milk or water to drink. Immediately seek medical aid!
